SUMMARY of CHANGE

DA PAM 708-1

Cataloging of Supplies and Equipment, Management Control Numbers

This revision--

- o Includes new activity codes and addresses that reflect the U.S. Army Aviation and Troop Command base realignment and closure changes (chap 2).
- o Deletes chapter 3.

Logistics

Cataloging of Supplies and Equipment, Management Control Numbers

By Order of the Secretary of the Army:

ERIC K. SHINSEKI
General, United States Army
Chief of Staff

Official:

JOEL B. HUDSON
Administrative Assistant to the
Secretary of the Army

History. This printing publishes a revision. Because the publication has been

extensively revised, the changed portions have not been highlighted.

Summary. This pamphlet provides uniform procedures for using and controlling management control numbers.

Applicability. This pamphlet applies to the Active Army, the Army National Guard of the United States, and the U.S. Army Reserve units that perform or supervise logistics functions. During mobilization, chapters and policies contained in this pamphlet may be modified by the proponent.

Proponent and exception authority. The proponent of this pamphlet is the Deputy Chief of Staff for Logistics. The Deputy Chief of Staff for Logistics has the authority to approve exceptions to this pamphlet that are consistent with controlling law and regulation. The Deputy Chief of Staff for Logistics may delegate this approval authority, in writing, to a division chief within the proponent agency in

the grade of colonel or the civilian equivalent.

Suggested Improvements. Users are encouraged to send in comments and suggested improvements to this pamphlet. The preferred method for sending in comments and suggested improvements is through the Internet site of the Logistics Integration Agency, located at <http://lia.army.mil>, Logistics Regulations and Pamphlets. Anyone without Internet access should submit comments and suggested improvements on DA Form 2028 (Recommended Changes to Publications and Blank Forms) directly to U.S. Army Materiel Command, Logistics Support Activity, ATTN: AMXLS-ML, Redstone Arsenal, AL 35898-7466.

Distribution. This publication is available in electronic media only and is intended for command levels C for Active Army and Army National Guard of the U.S., and D for U.S. Army Reserve.

Index

Chapter 1

Introduction

1-1. Purpose

This pamphlet provides uniform procedures for using and controlling management control numbers (MCNs). Excluded from the scope of this pamphlet are—

a. Medical items. Medical activities and centers will follow the guidance outlined in AR 40-61 and major Army command (MACOM) supplements and regulations in assignment of nonstandard stock numbers/MCNs. The Office of The Surgeon General (OTSG), Headquarters, Department of the Army (HQDA), (DASG-HCL), Washington, DC 20314-3258, should be contacted regarding the procedures governing medical materiel.

b. Brand name and non-brand name resale items. The Defense Supply Center Philadelphia (DSCP), 700 Robbins Avenue, Philadelphia, PA 19111-5092, should be contacted regarding the procedures governing brand name and non-brand name resale items.

c. The U.S. Army Communications-Electronics Command (CECOM) communications security (COMSEC) keys. The Commander, U.S. Army Communications Security Logistics Activity, (CSLA) ATTN: SELCL-NICP-LS, Fort Huachuca, AZ 85613-7090, should be contacted regarding the procedures governing communications security items. Examples consist of keying materiel, codes, authentication systems, non-machine ciphers, and telecommunication security devices.

d. Athletic clothing and footwear.

e. Commercial non-type classified clothing items authorized for local purchase in the common table of allowances (CTA) 50-900.

f. Regulated items in Federal supply classification (FSC) 8345 (Flags).

g. Television-audio support activity items. The American Forces Radio and Television Service (AFRTS) will screen the Federal Logistics Information System (FLIS) Total Item Record (TIR) monthly for cross-referencing reference numbers to national stock numbers (NSNs).

1-2. References

Required and related publications and prescribed forms are listed in appendix A.

1-3. Explanation of abbreviations and terms

Abbreviations and terms used in this pamphlet are explained in the glossary.

1-4. Requests for clarification

Use the chain of command to request clarification of this pamphlet.

a. Use a military memorandum when making a written request for clarification. Include in the memorandum the following:

(1) Page and paragraph number in question.

(2) Name and defense switching network (DSN) telephone number of the requester.

b. Each element in the chain of command receiving a clarification request tries to answer it. If unable to answer, that element sends it to the next higher element. This ensures that available talent is used and the most expeditious possible answers are given.

c. When Department of the Army (DA) clarification is necessary, send clarification requests to U.S. Army Materiel Command (USAMC) Logistics Support Activity, ATTN: AMXLS-ML, Redstone Arsenal, AL 35898-7466.

Chapter 2

Management Control Numbers

2-1. Overview

This chapter provides the procedures for assigning, using, and controlling MCNs for items that are not cataloged within the Federal Catalog System (FCS). Details for assigning blocks of MCNs are in AR 708-1, chapter 3. This chapter also addresses the policy established in AR 708-1, chapter 3.

2-2. Use of management control numbers

a. An MCN is authorized for internal use only and is not used to identify items in official publications or documents. An MCN may be used in any local document, as an aid in identification, if the document does not leave the local activity assigning the MCN except as provided in this chapter. The MCN record is kept only as long as there is a need to identify the item by the MCN.

b. As an exception, MCNs assigned by the U.S. Army Test and Evaluation Command (ATEC) are used to

permanently identify experimental munitions and related items, regardless of the installation or activity where stored or used. The assigned MCN remains valid until one of the following occurs:

- (1) All stocks are expended or demilitarized.
- (2) An NSN is assigned to the item.

c. MACOMs and activities listed in table 2-1 keep a register of the block number allotments as discussed in AR 708-1, chapter 3. ATEC maintains a central register for the assignment of all their MCNs. Project and program managers obtain MCNs from ATEC before initiating contracting actions for research, development, test, and evaluation equipment (RDTE) and prototype munitions, to ensure that necessary catalog data is obtained, and that MCNs assigned stay with the items throughout the life cycle.

2-3. Actions by users

a. Commanders of activities that assign MCNs will—

- (1) Keep a control register of MCN assignments that cross-references the MCN to an applicable part number and, when appropriate, to an NSN.
- (2) Conduct a semi-annual review of all assigned MCNs to determine which MCNs will be retained, cancelled, or replaced with an NSN, and to upgrade the control register.

b. Commanders of overseas commands, installations, facilities, continental United States (CONUS) posts, camps and stations, and subordinate activities within the commands or activities listed in table 2-1 will ensure that an item identified by a part or model number has not already been assigned an NSN. This is determined by checking cross-reference publications (internal historical reference material). Research to ascertain if there is an Army record of any NSN using the Army section of Federal Logistics (FEDLOG). Should research fail to trace the item to a valid NSN, the item is recorded and stored by part or model number, except when an MCN assignment is permitted by AR 708-1.

c. Commanders of USAMC wholesale storage depots.

(1) Commanders of storage activities that receive an item identified only by part number, and shipped by direction of a national inventory control point (NICP) and retail manager (RM), record and store that item by part number. A local MCN is not assigned, pending the receipt of a storage item data change card or other applicable instructions.

(2) Commanders of USAMC storage depots that receive stock returns without an NSN, part number, or reference number may assign an MCN to these items.

(3) Commanders of storage activities do not assign MCNs to stock returns that are identified by part numbers or reference numbers and have no NSNs. The part numbers or reference numbers are used to record and store items at the activity.

d. Commanders of national inventory control points and retail managers will—

- (1) Query the FLIS TIR to ensure that an item has not already been assigned an NSN before assigning an MCN.
- (2) Obtain an NSN for each item eligible for the FCS.
- (3) Ensure that items initially assigned an MCN are procured, shipped, stored, distributed, redistributed, requisitioned, issued, or disposed of by part number or NSN, not by MCN. Accordingly, when an item assigned an MCN is procured, the MCN is not released to the storage activity from which the item is shipped. Such items are shipped and stored by part number or NSN. As an exception, ATEC RDTE items may be procured, shipped, stored, distributed, redistributed, or disposed of per their assigned MCNs.

2-4. Use of table 2-2

a. The FSC assignments to Army activities under integrated materiel management by the Defense Logistics Agency (DLA) and General Services Administration (GSA) are determined by table 2-2. The materiel management assignments for Army activities under the end item manager concept are determined on an item-by-item basis, rather than by FSC; thus, this table is to be used only when the end item or end item manager is unknown.

b. The FSC assignments are presented in the 4-digit FSC sequence. The presently established FSCs, along with the inclusions and exclusions that limit the coverage of a particular FSC, are published in the Supply Bulletin (SB) 708-21 (Cataloging Handbook H2-1).

Notes:

¹ U.S. Army Aviation and Missile Command (AMCOM) is responsible for the life cycle management of all Army small free rocket/rocket systems as defined in the General Support Agreement between the U.S. Army Armament and Chemical Acquisition Logistics Activity (ACALA) and the AMCOM on Small Free Rockets, dated 17 January 1975.

² TACOM is the central point of contact for combat, assault, and tactical tracked vehicle in this FSC class. ACALA is the central point of contact for self-propelled artillery.

³ TACOM is designated as the mission assignee for all end items in the FSC classes. The Defense Logistics Information Services, Army Cataloging, (DLIS-A) is the central point of contact and the activity assigned Army Retail Management responsibility for all components.

⁴ ACALA is the manager for all items in these 43 FSC classes (FSG 34 and 36) that qualify as industrial plant equipment with an acquisition cost of \$3,000 or more, and for all reparable end items.

⁵ TACOM is the central point of contact for major end items in these FSC classes. DLIS-A is the central point of contact for all repair parts that are under DLA/GSA integrated materiel manager (IMM) management.

⁶ U.S. Army Medical Materiel Activity (USAMMA) performs the secondary inventory control activity (SICA) functions for all items in FSG 65 as delegated by The Surgeon General (TSG).

⁷ TSG is the mission assignee for medical materiel items in FSC classes 6630 and 6640. USAMMA performs the SICA functions as delegated by TSG; DLIS-A is the central point of contact for non-medical items in FSC classes 6630 and 6640.

⁸ Regulated items of data processing equipment are procured by the Chief of Staff, Army, Director of Army Automation (DAA), through the U.S. Army Computer System Selection and Acquisition Agency. Inventory and reutilization functions are performed by the U.S. Army Signal Command.

⁹ The Defense Energy Supply Center (DESC) will manage the bulk products and the Defense Supply Center Richmond (DSCR) will manage the package products in FSC 9150.

¹⁰ TACOM is the DOD Integrated Materiel Manager for items in these FSC classes peculiar to combat and tactical vehicles of Army design.

2-5. Use of table 2-3

Table 2-3 identifies activity codes and abbreviations by command and activity names and addresses.

Table 2-3 Activity codes, abbreviations, names, and addresses	
Activity Code/Abbreviation	Command/Activity Name and Address
AJ/SBCCOM	Commander, U.S. Army Soldier and Biological Chemical Command, Natick, MA 01760
AM/USAMMA	Commander, U.S. Army Medical Materiel Agency, ATTN: SGMMA-OD, Frederick, MD 21701-5001
AS/TSG	The Surgeon General, HQDA (DASG-HCL), Wash, DC 20310-2300
AX/DSCC	Commander, Defense Supply Center Columbus, 3990 East Broad Street, Columbus, OH 43216-5000
AZ/TACOM	Commander, U.S. Army Tank-automotive and Armaments Command, ATTN: AMSTA-IM-MMAB, Warren, MI 48397-5000
BD/AMCOM	Commander, U.S. Army Aviation and Missile Command, Integrated Materiel Management Center, ATTN: AM-SAM-MMC, Redstone Arsenal, AL 35898-5230
BF/ACALA	Commander, U.S. Army Armament and Chemical Acquisition Logistics Activity, ATTN: AMSTA-AC-MCMLP, Rock Island, IL 61299-6000
CA/DLIS-A	Commander, Defense Logistics Information Services, Army Cataloging, Battle Creek, MI 49017
CD/DLIS-A	Commander, Defense Logistics Information Services, Army Cataloging, Battle Creek, MI 49017
CL/CECOM	Commander, U.S. Army Communications-Electronics Command, ATTN: AMSEL-LC-MMD-IA, Fort Monmouth, NJ 07703-5006
CM/CSLA	Commander, Communications Security Logistics Activity, ATTN: SELCL-LO-C, Fort Huachuca, AZ 85613-7090
CT/AMCOM	Commander, U.S. Army Aviation and Missile Command, Integrated Materiel Management Center, ATTN: AM-SAM-MMC, Redstone Arsenal, AL 35898-5000
CU/CECOM	Commander, U.S. Army Communications-Electronics Command, Logistics Readiness Center, ATTN: AM-SEL-LC, Fort Monmouth, NJ 07703-5006
CX/DSCR	Commander, Defense Supply Center Richmond, 8000 Jefferson Davis Highway, Richmond, VA 23297-5000
CY/DSCP	Commander, Defense Supply Center Philadelphia, ATTN: DSC-P-TTF, 700 Robbins Avenue, Philadelphia, PA 19111-5092
CZ/DSCP	Commander, Defense Supply Center Philadelphia, ATTN: DSC-P-HSL, 700 Robbins Avenue, Philadelphia, PA 19111-5092
KX/DSCP	Commander, Defense Supply Center Philadelphia, ATTN: DSC-P-RSC, 700 Robbins Avenue, Philadelphia, PA 19111-5092
KY/DESC	Commander, Defense Energy Support Center, 8725 John J. Kingman Road, Ft. Belvoir, VA 22060-6222
KZ/DSCP	Chief, General and Industrial Directorate, ATTN: DSCP-IRE, 700 Robbins Avenue, Philadelphia, PA 19111-5096
TX/DSCC	Commander, Defense Supply Center Columbus, 3990 East Broad Street, Columbus OH 4316-5000
75/GSA	General Services Administration, Federal Supply and Services, Cataloging Division, ATTN: FOCO, Washington, DC 20406
CSA	Chief of Staff, Army, HQDA (DACS-DI) Washington, DC 20310
T-ASA	Chief, Television-Audio Support Activity, ATTN: SELTV-D, Sacramento Army Depot, Sacramento, CA 95813
AMC	Commander, U.S. Army Materiel Command, ATTN: AMCSM-MSM, 5001 Eisenhower Avenue, Alexandria, VA 22333-0001
AMC LOGSA	Commander, USAMC LOGSA, ATTN: AMXLS-ML, Redstone Arsenal, AL 35898-7466
DLA	Director, Defense Logistics Agency, 8725 John J. Kingman Road, Ft. Belvoir, VA 22060-6222
ARL	Director, Army Research Laboratory, 2800 Powder Mill Road, Adelphi, MD 20783-1145
NSA	Director, National Security Agency, ATTN: L112, Ft. George G. Meade, MD 20755

Index

This index is organized alphabetically by topic and subtopic. Topics and subtopics are identified by paragraph number.

Brand name items, 1-1b

Communications security items, 1-1c

Control register of MCNs, 2-3a(1)

Experimental munitions, 2-2b

Federal supply catalog system, 2-4a

Assignments, 2-4a

Management control numbers, 2-1 and 2-2

Assignment of, 2-3

Control register, 2-3a(1)

Review of, 2-3a(2)

Medical items, 1-1a

Non-brand items, 1-1b

Request for clarification, 1-4

Storage item data change card, 2-3c(1)
